**DETAILED ACTION**

***Specification***

The abstract of the disclosure is objected to because it is over 150 words.

Correction is required. See MPEP § 608.01(b).

***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "L2" has been used to designate both the vertical optical axis between element 6 and 12 and the horizontal axis between element 12 and 16. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1, 2, 9, 10, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujieda (US Patent No. 5,500697).**

**Regarding claims 1, 9, 11, and 13,** Fujieda discloses a refractive measurement apparatus (see Fig. 1) comprising: a projection optical system (1), a photo-receiving optical system (14), lens system (7, 9, 11, 12, 13), moving means for moving the lens system (22 and see also column 5 lines 40+), and calculation means (22, see also column 5 lines 49+).

**Regarding claim 2,** the moving means (22) provides measurement pattern (for example, see Figs. 4a and 4b and see column 5, line 62+).

**Regarding claim 10,** see the rejection of claim 1 above and note that the microcomputer 22 of the Fujieda reference is considered as the lens meter.

#### ***Allowable Subject Matter***

**Claims 3-8, 12, and 14** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: none of the prior art of record anticipate or render obvious positioning a lens system that deviates from the optical axis of a photo-receiving optical system and wherein the moving means includes a rotation means that rotates the lens system about the optical axis of the

photo-receiving optical system, when affixed in the manner claimed in combination with the other recited features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
